Recipe - Food - Nutrition API Documentation

The spoonacular Recipe - Food - Nutrition API gives you to access to thousands of recipes, storebought packaged foods, and
and semantic recipe search engine makes it possible to search for recipes using natural language queries, such as "gluten free
cupcakes." You can automatically calculate the nutritional information for any recipe, estimate recipe costs, visualize ingredient
recipes based on special diets, nutritional requirements, or favorite ingredients, classify recipes into types and cuisines, convert
meal plan. With our powerful API, you can create many kinds of food and nutrition apps.

Special diets/dietary requirements currently available include: vegan, vegetarian, pescetarian, gluten free, grain free, dairy free,
ketogenic, and more.

🔍 Search endpoints
